How to read the scores

Grade 9 math: percentage at or above the provincial standard. OSSLT: success rate among first-time eligible students. Both use fully participating students. Combined gives each assessment equal weight; the two tests involve different cohorts.

BEFORE YOU CHOOSE A HOME

Use the scores to start a shortlist. Then confirm the exact address, program eligibility and current school boundaries with the board. Consider school culture, student supports and your child's needs alongside test results.

Ties share a rank. Public = HDSB; Catholic = HCDSB. French-language boards and private schools are outside this comparison. Small score differences should not be overinterpreted.
