Meet Sasha, a one-year-old mixed breed from Mexico. Sasha had a rough start to life; she was found with a broken leg on a construction site in Playa del Carmen by a rescuer from Belize. The rescuer could not take her back to her rescue so she took the ferry to Cozumel to have her leg fixed in March by a top surgeon in Mexico. Sasha now has a healed scar where a plate was placed in her left hind leg. It has not been an issue since the surgery, and does not restrict her. Sasha had been living at the clinic up until recently when she was transferred overseas to us.

Sasha is a shy but very sweet young girl. She tends to overcome her shyness quickly when in the presence of patient and calming people. She loves other dogs but has not been tested with cats.

She is spayed, microchipped, and up to date on her vaccinations.
